# Introduction

## What is mobiEMR

mobiEMR stands for Mobile Electronic Medical Records. It was developed to cater for a variety of services, mostly used as a Health Information Management System tool, but as a generic system, it can literary be applied in any use case.

## Households in mobiEMR

In mobiEMR, independant clients can be related to each other. These relationships are realised in form of structured households that holds a finite number of related members.

## Household Programs in mobiEMR

Programs that are taken as a household are listed under household programs. Only clients who are part of households can be enrolled into these programs, therefore it is crucial to add a client prior to program enrolment.

## Dreams PCC with mobiEMR

The DREAMS Parent to Child Communication (PCC) program is part of Household Programs on the mobiEMR application. The process of enrolling related clients to participate in the DREAMS PCC program was simplified with our easy to use User Interface (UI) and navigation.

## Authentication

The mobiEMR application uses an advanced framework to authenticate its users through our mobiEMR Connect authenticator, which guarantees secure login while safeguarding data access restrictions.

### Steps to Login

Follow the arrows to complete user authentication with mobiEMR Connect

## **Home Screen**

After a successful authentication process, you will be directed to a scrollable homescreen with buttons leading to your desired module within mobiEMR. These modules are role protected for different users.

## Households

Registered households are displayed in a scrollable table view with a search functionality to easily find your desired household.

### **Register a Household**

To register a new household program, click on the (+) floating icon and complete the displayed form.
