Introduction

What is mobiEMR

mobiEMR stands for Mobile Electronic Medical Records. It was developed to cater for a variety of services, mostly used as a Health Information Management System tool, but as a generic system, it can literary be applied in any use case.

Observation Diary in mobiEMR

In mobiEMR, the Observation Diary Program is used by approved health workers and supervisors to assess the referral process of a completed referral. The permitted user can answer an observation questionnaire once the referrals are marked complete.

Authentication

The mobiEMR application uses an advanced framework to authenticate its users through our mobiEMR Connect authenticator, which guarantees secure login while safeguarding data access restrictions.

Steps to Login

Follow the arrows to complete user authentication with mobiEMR Connect

Home Screen

After a successful authentication process, you will be directed to a scrollable homescreen with buttons leading to your desired module within mobiEMR. These modules are role protected for different users.

Observation Diary

To access the observations screen, the logged user must have the neccessary level access to navigate. You can access the screen by clicking the observations button on the homescreen.
